

Treatment Guidelines for Immediate Provisional Restoration in the Aesthetic Zone

TECHTALK

Dental Education
Learn. Do. Excel.®

Co-Hosted by: ZimVie Dental, iTero®, and

Attendees will receive a strong theoretical basis for managing single-tooth implants in the aesthetic zone. A secondary objective will be to maximize peri-implant soft-tissue aesthetics around definitive restorations – critical elements for achieving.

Program Objectives:

- Review clinical data prior to treatment planning for this type of restoration.
- Learn the difference between immediate loading and immediate non-occlusal loading.
- Become familiar with different methods of fabricating immediate single unit non-occlusal loaded provisional restorations.
- Take part in a hands-on product review.
- Observe an Over-the-Shoulder (OTS) anterior temporary fabrication and custom impression coping.

Wayne Szara, CDT

Wayne Szara is a Marketing Technical Specialist with ZimVie Dental. He is a 30 year CDT with over 31 years of experience in the dental industry. Wayne holds degrees in dental technology and vocational education from Triton College and Southern Illinois University. He has a broad knowledge of laboratory procedures and the skills to present new information in a clear and engaging manner. For 18 years, Wayne has been presenting numerous seminars for ZimVie Dental, including hands-on implants and implant prosthetics programs throughout North America as well as internationally. His programs are presented to oral surgeons, periodontists, general dentists, denturists, dental technicians and even patients. He assists dentists and dental technicians daily with queries about dental implant restoration. A published author, Wayne's technical articles have appeared in peer-reviewed journals, and he is recognized by the military as an outstanding seminar leader in their professional development program for dentists and dental technicians. In addition, he has worked for Sterngold and 3M ESPE.
